*Joshua*  
Dear Dr. ~~Lederberg~~:-

When I saw you in Madison last summer, you mentioned some recent work by Winn which you thought rather convincing evidence that so-called, "direct bacterial antagonism" was actually the result of antibiotic production. Could you tell me how I could run down this work, or get in touch with the investigator?

I enjoyed my little visit with you very much and hope I may look forward to a longer one sometime when you are coming to Chicago.

My greetings to your wife.

Sincerely yours,

*Phillip*  
C. Phillip ~~Miller~~, M. D.
